PROFESSIONAL SUMMARY

Systems Engineer from Universidad del Magdalena (2026) whose capstone, awarded **Meritorious Distinction**, was a conversational assistant built with Generative AI, LLMs and RAG (Retrieval-Augmented Generation). Hands-on experience designing and delivering end-to-end solutions for real clients: requirements gathering, business process analysis, database design, development, testing, deployment, user training and support. Focused on process automation (n8n, Power Automate), system integration through REST APIs and relational databases (SQL Server, MySQL, PostgreSQL).

PROFESSIONAL EXPERIENCE

IT Solutions Consultant & Software Developer — Freelance | Jul 2025 – Present

Client: JM Barber barbershop — Online booking system (in production) | Nov 2025 – Present

- Analyzed the client's manual scheduling process, which caused double bookings and time lost answering messages, and gathered requirements end to end.
- Designed the database model (appointments, schedules, blocked slots, VIP clients, notifications) and built a progressive web app (PWA) with JavaScript, Supabase (PostgreSQL) and push notifications.
- Automated appointment reminders and deployment with GitHub Actions; ran functional tests, trained the end user and provide ongoing support and improvements.

Client: Neighborhood store — Sales and inventory management system | Jul 2025 – Dec 2025

- Gathered requirements and analyzed the sales and inventory process to identify the business's real problem.
- Designed the database and built the solution to track stock, sales and electronic payments (Nequi and bank transfers), reducing operational errors.
- Handled testing, deployment and user training, and provided about 3 months of post-launch support and adjustments.

EDUCATION

B.S. Systems Engineering — Universidad del Magdalena | 2021 – Sep 2026

- Capstone (research internship) awarded **Meritorious Distinction**: "NLP-based chatbot as a virtual assistant for the Systems Engineering academic community".
- Integrated multiple academic data sources through APIs and designed the retrieval (RAG) pipeline with LLMs; evaluated model answers for accuracy, relevance and hallucinations, and documented the technical and functional design.

Technical Degree, Computer Systems Assistant — ITSA | 2020

PROJECTS

- **Camino de la Palabra:** full-stack web app with Next.js 14, React, PostgreSQL and Docker: chapter progress, per-chapter chat, streaks and push notifications.
- **Personal portfolio:** bilingual site in HTML, CSS and JavaScript, containerized with Docker and nginx and deployed on a VPS with Easypanel.

CERTIFICATIONS

- Android App Development with Kotlin — Udemy (67.5 h), 2025
- English Does Work, levels 1 to 9 — SENA (432 h), 2024 – 2026
- Programming — Colombian ICT Ministry & Universidad Tecnológica de Pereira (60 h), 2020
- Excel Programming with VBA — Corporación Educativa Formar (16 h), 2020

SKILLS

Development: Python, JavaScript, TypeScript, SQL, Kotlin, Node.js, Next.js, React, Angular, HTML, CSS
Databases: SQL Server, MySQL, PostgreSQL, Supabase, relational data modeling, queries for analysis and troubleshooting
Integration & automation: REST APIs, JSON, XML, Postman, n8n, Power Automate, ETL, conditional logic and validations
Applied AI: Generative AI, LLMs, RAG, prompt engineering, AI integration via APIs, response evaluation
DevOps & tools: Git, GitHub, GitHub Actions, Docker, nginx, Easypanel
Functional support: requirements gathering, incident analysis and diagnosis, functional testing, deployment, user training, documentation
Soft skills: Communication with non-technical users · Requirements analysis · Analytical thinking and problem solving · Documentation · Attention to detail · Fast learner · Proactive and self-directed

LANGUAGES

Spanish: native · **English:** B2 (upper-intermediate)
